

# Reproduction de figure par coloriage

## Consignes

Pour chacune des figures suivantes, il faut reproduire la figure (située à gauche) en coloriant la trame vide ou en repassant sur les lignes de la trame vide (située à droite). On peut utiliser les couleurs que l'on souhaite.

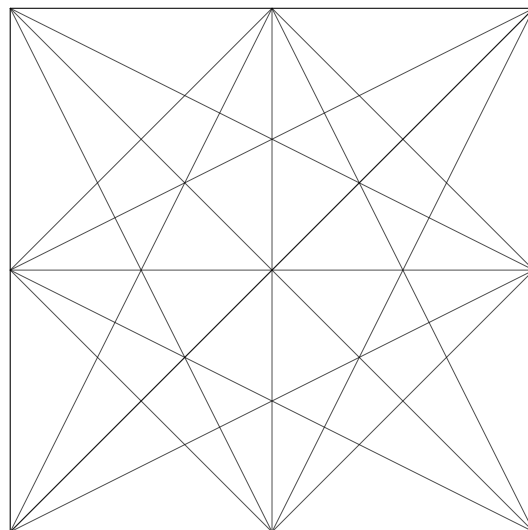

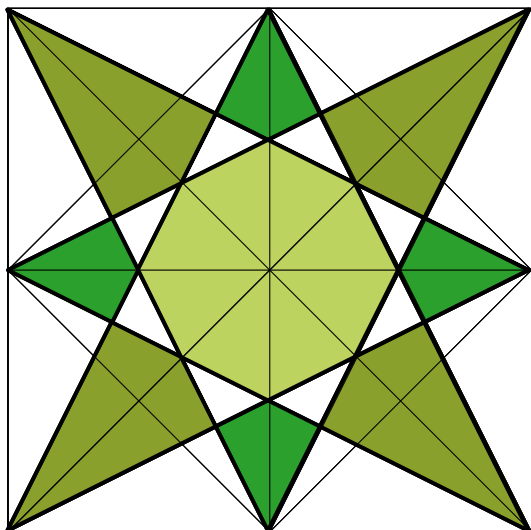

## A l'intention de l'enseignant

Les figures ne sont pas à donner en une seule fois ni forcément à tous les élèves. Il est préférable de découper chaque situation plutôt que de donner une page entière.

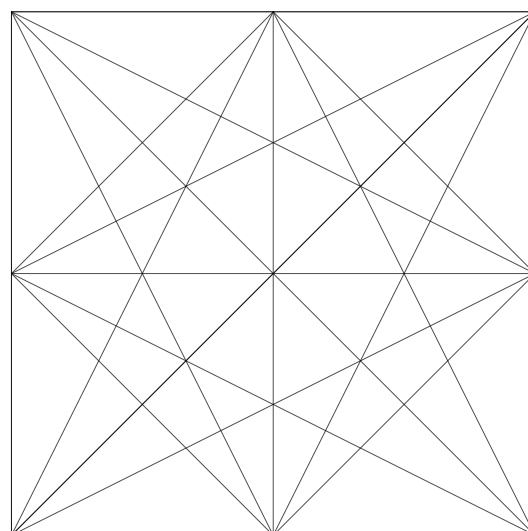

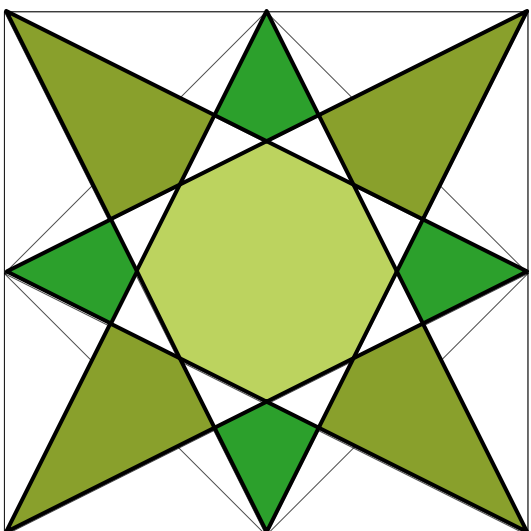

Les figures sont classées par ordre de difficulté selon plusieurs critères :

- la complexité de la trame : trame simple (page 1 et 2), trame complexe (page 3 et 4),
- la trame est apparente ou non apparente sur le modèle,
- les polygones à colorier sont assez facilement identifiables sur la trame (situation 1 et situation 6) ou alors ils sont plus difficiles à identifier car issus d'un assemblage ou encore de superpositions.
- les lignes sont apparentes sur la trame ou bien certaines sont à ajouter (situation 15)
