

6. Encore des panneaux

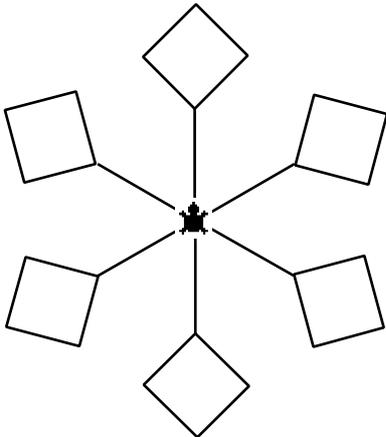

Ecrire une procédure pour chacune des figures suivantes en utilisant la procédure "Panneau3":

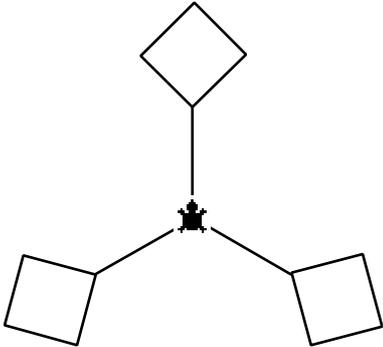

Etoile1

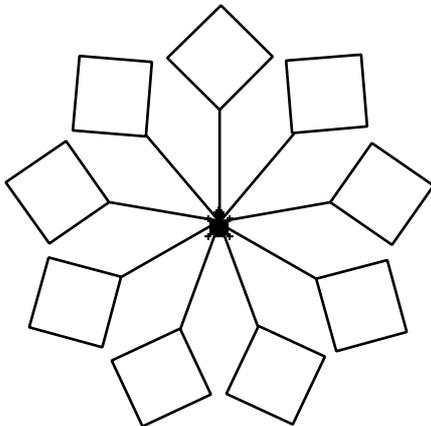

Etoile2

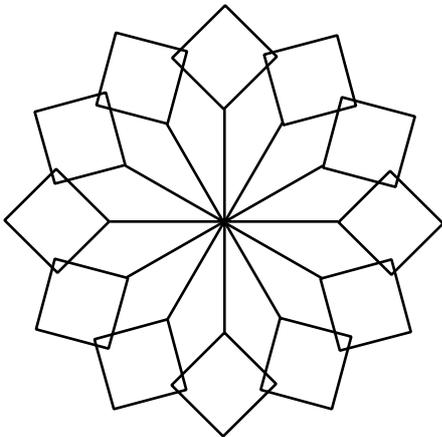

Etoile3

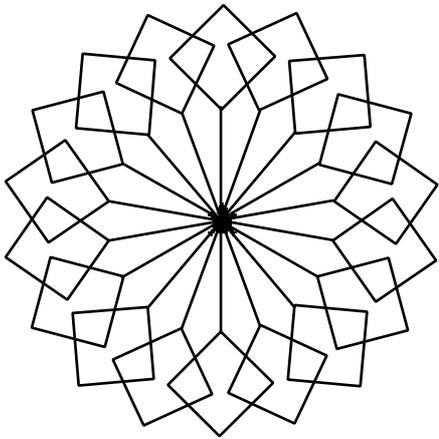

Etoile4

Etoile5

Etoile6

Etoile7

Maintenant, tu peux créer tes propres étoiles en utilisant les procédures: "Panneau1", "Panneau2" et "Panneau3"

Par exemple:

The first example shows a central point with five lines extending at various angles to five squares. The second example shows a central point with ten lines extending at 36-degree angles to ten squares, similar to Etoile5 but with a different orientation.
